Doosan Infracore America is the fastest growing forklift and lift truck corporation in the North American market, thanks to its excellent level of product performance and their persistently high level of buyer support and service given to all Doosan Infracore Lift Truck clients. The U.S. lift Truck division based in Cleveland has a expert team knowledgeable in Sales, Purchasing, Advertising, Logistical and Technical Support.

At first the domestic lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a domestic machinery expansion venture. Product sales of these goods were initially targeted to state-run corporations, large scale organizations, and the armed forces. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical training grew to become the new focus for improving quality and product development.

Daewoo started the first domestic lift truck business in 1967, and rapidly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological improvements combined with sales success placed them in a position of substantial growth of their forklift operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to respond to competitive pressures in the US materials handling industry. This endeavor radically expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a modern plant which helped launch the company for the fabrication of high end added-value goods suited for export. In 1993, the corporation had a global sales network and started exporting versions they had developed through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas marketplaces.
