

Toyota Forklift Parts

Toyota Forklift Part - Since 1992, Toyota Material Handling inc., U.S.A., often known as TMHU, have been the best selling lift truck dealer in the U.S. This business has been based out of Irvine, California for well over 40 years, offering a wide-ranging line of quality lift trucks. With a great reputation of stability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the cornerstone of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota machines and parts designed within North America adhere to the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its dedication to continual improvement and its environmentally friendly systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70 percent fewer smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and regulations.

TMHU, U.S.A. - Leading the Industry

Brett Wood, President of TMHU, links Toyota's accomplishment to its stout dedication to constructing the finest quality lift trucks at the same time as delivering the utmost client service and assistance. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's largest lift truck dealer and is amongst the magazines impressive World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an excellent company philosophy towards environmental stewardship within Toyota. Toyota's loaded history of environmental protection whilst retaining economic viability cannot be matched by other companies and undoubtedly no other materials handling producer can yet rival Toyota. Environmental responsibility is a fundamental characteristic of company decision making at Toyota and they are proud to be the first and only maker to offer UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift trucks. Yet an added reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission standards, and also meets California's more involved 2010 emission standards. The finished creation is a lift vehicle that creates 70% fewer smog forming emissions than the present Federal standards tolerate.

Also starting in 2006, together with the Arbor Day Foundation, Toyota added to its dedication to the environment. To this day more than 58,000 trees have been embedded in the ground throughout national forests and community parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's system of dealers to non-profit organizations and local consumers to help sustain communities all over the United States

Toyota's lift vehicles provide improved productivity, visibility, ergonomics and resilience, and most notably, the industry's leading safety technology. The company's System of Active Stability, also known as "SAS", helps decrease the chance of mishaps and accidental injuries, and increasing productivity levels while minimizing the potential for merchandise and equipment breakage.

System Active Stability senses various aspects that could lead to lateral insecurity and potential lateral overturn. When one of those conditions are detected, SAS immediately engages the Swing Lock Cylinder to steady the rear axle. This alters the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to avoid injuries or accidents while adding stability.

The SAS systems were initially adopted on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped propel Toyota into the lead for industry safety standards. Now, SAS is used on almost every modern internal combustion models and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with compulsory worker education, overturn fatalities across all models have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% drop in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's standard of brilliance reaches far beyond its technological achievements. The company maintains a widespread Operator Safety Training course to help customers meet OSHA standard 1910.178. Education programs, videos and a variety of materials, covering a wide scope of matters-from individual safety, to OSHA rules, to surface and cargo situations, are offered through the dealer network.

Since the transaction of its first lift vehicle in the U.S. to the construction of its 350,000th lift truck produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has sustained a solid existence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks sold in America at the moment are manufactured in the United States.

TMHU is situated in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of land. Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and service

components, with the entire commitment exceeding \$113 million dollars.

The new NCC was built to operate for TMHU customers and dealers. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an section for live product demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its founder, Sakichi Toyoda, in 1867, and finally a instruction center.

TMHU has 68 authorized industrial equipment dealers, along with 189 dealership locations throughout the United States, providing the most comprehensive and inclusive client support and customer service in the industry. The company's new and Licensed Used lift vehicles, service, parts, and financing features make Toyota dealerships a one-stop shop to guarantee total customer satisfaction.
